VERSION 1

```
foreach $key (keys %delete_list) {

                  my $dir = $build_photo_path;
                  my (@files) = ();
                  &header;
          opendir(DIR, $dir) || &err("can’t open : $!");
                  @files = grep { /$key\.*/i } readdir(DIR);
                  closedir(DIR);

                  if ($#files > -1) {
              foreach (@files) {
                unlink("$dir/$_") || &err("can’t delete $_ : $!");
                          }
              }
}
```

VERSION 2

```
foreach $key (keys %delete_list) {
  my $dir = $build_photo_path;
  my (@files) = ();
  &header;
  opendir(DIR, $dir) || &err("can’t open : $!");
  @files = grep { /$key\.*/i } readdir(DIR);
  closedir(DIR);
  if ($#files > -1) {
    foreach (@files) {
      unlink("$dir/$_") || &err("can’t delete $_ : $!");
    }
  }
}
```

VERSION 3

```
opendir(DIR, $build_photo_path) || &err("can’t open $build_photo_path: $!")
;
@all_files = readdir(DIR);
closedir(DIR);

foreach $key (keys %delete_list) {
  &header;
  foreach (grep { /^$key\./i } @all_files) {
    unlink("$build_photo_path/$_") || &err("can’t delete $_ : $!");
  }
}
```
